Expanite welcomes Thorsten Schild as Business Development Manager

Expanite, the Danish specialist in heat treatment and surface hardening of stainless steel and titanium, is thrilled to announce the addition of Thorsten Schild as Business Development Manager. With 25+ years expertise within the field, the appointment of Thorsten Schild will further strengthen Expanite's commercial and technical service, and thereby support the company's ambitious growth strategy.

Prior to joining Expanite, Thorsten Schild worked for Bodycote's S3P division as group sales director, and he was one of co-founders of BorTec-SMT. All-in-all, Thorsten Schild can in many ways be regarded as one of the most experienced people within sales and marketing of stainless steel surface hardening. Over more than 25 years, he has assisted countless customers across many industries globally on finding solutions for wear and galling on stainless steel.

As Business Development Manager within Expanite, Thorsten will play a key role in expanding Expanite's reach and solidifying the position as a leader in surface hardening solutions. With his extensive industry knowledge and network, he will contribute to the company's strategic initiatives and drive business growth.

"We are delighted to welcome Thorsten to the Expanite team," says Thomas Abel Sandholdt, CEO at Expanite. "Combining his proven sales expertise with Expanite's unique process-related benefits in surface hardening of stainless steel makes it a perfect match. The appointment will reinforce our commitment to deliver cutting-edge solutions and services for all sectors requiring increase protection against wear, galling and corrosion."

Thorsten Schild already started his role as Business Development Manager at Expanite, and will collaborate closely with the existing team to drive innovation, strengthen customer relationships, and identify new business opportunities.

About Expanite:

Expanite is a Danish company specializing in heat treatment and surface hardening of stainless steel and titanium. Expanite has established itself as a pioneer and trusted partner in the industry. The sustainable and patented surface hardening processes improve galling, wear and corrosion resistance on stainless steel and titanium parts in a wide range of applications and industries.

The company has its head office in Hillerød near Copenhagen and service centers and licensees in the USA, Germany, Korea, and China. Expanite's DNA is based on sustainable solutions to extend the life of components made of stainless steel, titanium, and other high-value alloys - and the business model allows for license agreements whereby customers may implement the technology in their production lines. www.expanite.com
